

Eco-Maize

Description: Eco-Maize is a blend of condensed molasses solubles (a high protein by-product from the fermentation of molasses) and delactose whey permeate (a nutritious by-product of the Irish Dairy industry). Eco-Maize offers an extremely cost effective alternative to other protein concentrates.

Typical analysis (as fed basis):

Dry Matter	57%
ME	6.6 MJ/kg
Crude Protein	20%
Sugars	20%
Fibre	Nil
Oil	Trace
Ash	11%
Calcium	0.6%
Magnesium	0.3%
Phosphorus	0.4%
Potassium	2.1%
Sodium	1.3%
Litres/tonne	784

Feeding guidelines: Eco-Maize is an excellent supplement for low protein feeds & forages. It combines rumen degradable protein with a rapidly available energy source. It can be top-dressed on forages, mixed with dry feeds, or fed in a diet feeder as part of the TMR. It can also be fed free access through lick wheel/ball feeders.

Dairy cows: Up to 3kg (normal 1-2kg) per head per day or 15% of the total diet mix

Beef cattle: Up to 2.5kg (normal 1-2kg) per head per day or 15% of the total diet mix

Young cattle: Up to 1.5kg or 5% of the total diet mix

Sheep: Lambs 10% of diet (0.4kg per head per day) & ewes 15% of diet (0.8kg per head per day)

Key Benefits:

- ✓ Ideal balancer to low protein forages such as maize, whole crop silage and straw
- ✓ Good source of degradable protein
- ✓ Excellent palatability
- ✓ Increases nutrient density of diet
- ✓ Ability to bind TMR ingredients and prevent separation

Storage: Can be safely stored in vented waterproof tanks for up to 6 months.

Delivery: Eco-Maize is available in bulk deliveries nationwide, ranging from 10 up to 28 tonnes.
